

Midterm Project

Crystal Mandal

last generated April 6, 2026

Concept + Methodology

The concept for this “piece” (and, more accurately, the messy collection of associated python and bash scripts) stems from an interest in both the serial music concerned with pitch classes and tone rows (e.g. Boulez and Webern) and the algorithmic music concerned with structure and mathematical generation (e.g. Stockhausen and Xenakis). Thus, this piece is composed of two musical segments to be understood in counterpoint with another. Both segments are generated the same way:

1. First, a tone row and corresponding tone matrix is generated.
2. Second, a sequence of Rows from said matrix is generated.
3. Third, a sequence of pitches is generated using the following concatenation rule:

Given two sequences of pitches, the second sequence is appended to the first at the last occurrence of the first pitch in the second sequence.

Thus, joining [0 1 2 3 4 5] and [3 2 1] produces [0 1 2 3 2 1].

4. Finally, a sequence of durations is generated randomly exclusively for aural interest. The sequence of durations serves no structural purpose and is simply used for aural scaffolding to support the listener.

Additionally, the metadata (that is, the sequence of rows and their transitions) is annotated underneath the music. The first segment, which shall be referred to as the ‘flat’ segment, is subject to the following constraints:

- A minimum of sixteen ‘measures’ of music, guaranteed by a minimum of sixty-four generated pitches.
- There is no preference or weighting given to the sequence of rows selected; each possible subsequent row is equally likely, and the probability distribution looks ‘flat’ - hence the name.
- The sequence of rows ends on **P0** or **I0**.

The second segment, uses a Markov process to generate the sequence of rows and is subject to the following constraints:

replacewithGenerated Music

- Again, by the same methods, a minimum of sixteen ‘measures’ and sixty-four pitches is generated.
- At each step in the sequence of rows, the subsequent row is chosen by a Markov process detailed by the Markov table in the appropriate section.
- The sequence of rows ends on **P0** or **I0**.

This second segment is appropriately named the ‘Markov’ segment.

Generated Music

Tone Row

The Generated Tone Row is:

Tone Matrix

The table generated for the tone matrix is:

3	9	7	5	6	2	4	e	1	8	t	0
9	3	1	e	0	8	t	5	7	2	4	6
e	5	3	1	2	t	0	7	9	4	6	8
1	7	5	3	4	0	2	9	e	6	8	t
0	6	4	2	3	e	1	8	t	5	7	9
4	t	8	6	7	3	5	0	2	9	e	1
2	8	6	4	5	1	3	t	0	7	9	e
7	1	e	9	t	6	8	3	5	0	2	4
5	e	9	7	8	4	6	1	3	t	0	2
t	4	2	0	1	9	e	6	8	3	5	7
8	2	0	t	e	7	9	4	6	1	3	5
6	0	t	8	9	5	7	2	4	e	1	3

‘Flat’ Segment

The music generated with the aforementioned parameters is displayed below:

A musical score for a single melodic line in treble clef, common time (C). The key signature is one flat (B-flat). The score consists of 11 staves, each containing 8 measures, for a total of 88 measures. The notation includes various note values (quarter, eighth, and sixteenth notes), rests, and accidentals (sharps and naturals). Below the staff, Roman numerals indicate the harmonic structure at specific measure boundaries: I10, I1, I11, R15, R4, I7, P6, R7, R11, P7, P1, R1, R5, R11, R0, R7, P8, I4, R1, P6, R16, R11, I5, I6, P6, I1, R18, I1, R12, R0, R19, R0, R15, R4, and R12.

Markov Chain Table

The table generated for the Markov Chain is too long to display on one page, so it is broken up into multiple pages below:

‘Markov’ Segment

The music generated by using the above Markov Table in a Markov Chain Process is displayed below:

96

117 P_{10}

124 P_7 RI_3 I_1

132 RI_9 RI_7 R_9

140 R_4

148 P_8 P_6 I_{10}

156 RI_{11} P_7

164 I_0

Computer Code

The music is generated by the `midterm.py` script in the `./python` folder.

To generate a new `midterm.pdf` document, run the script `./generate.sh` .

The generated document is available as `assignment-print.pdf` in the root directory.
